Sun, 09 Dec 2018 22:39:00 GMT Hypertension, Dialysis and Clinical Nephrology - Kidney - Statins, also known as HMG-CoA reductase inhibitors, are a class of lipid-lowering medications. Statins have been found to reduce cardiovascular disease and mortality in those who are at high risk of cardiovascular disease. The evidence is strong that statins are effective for treating cardiovascular disease in the early stages of the disease (secondary prevention) and in those at elevated risk ...

Sat, 08 Dec 2018 23:37:00 GMT Statin - Wikipedia - An analgesic or painkiller is any member of the group of drugs used to achieve analgesia, relief from pain.. Analgesic drugs act in various ways on the peripheral and central nervous systems. They are distinct from anesthetics, which temporarily affect, and in some instances completely eliminate, sensation. Analgesics include paracetamol (known in North America as acetaminophen or simply APAP ...

Sun, 09 Dec 2018 22:39:00 GMT Analgesic - Wikipedia - Introduction.

The hypertensive disorders of pregnancy (HDP) remain leading causes of maternal and perinatal morbidity and mortality , . This guideline summarizes the quality of the relevant existing evidence and provides a reasonable approach to the diagnosis, evaluation, and treatment of the HDP.
